

MileX Email Service Pricing and Purchase Guide

Prepared for MileX project. Pricing checked on June 4, 2026. Prices can change, so confirm in each provider dashboard before payment.

Short recommendation: Low budget hole **Mailgun Free** diye start koro. Jodi paid korte hoy and tomar preference Mailgun/Postmark hoy, tahole **Mailgun Basic \$15/mo** is the best starting choice. Postmark \$15/mo is excellent for pure transactional delivery, but its free tier is much smaller.

What MileX Needs

MileX er email mainly transactional email: offer letter send, rate forwarded notification, line manager approval/revision notification, and customer activation confirmation.

Important requirements:

- Customer email recipient will come from KAM Recommendation form field: Email Address.
- Internal recipients can be fixed env values: SALES_EMAIL, LINE_MANAGER_EMAIL, KAM_EMAIL.
- Email should be sent from backend API, not directly from frontend.
- Sender domain should be verified with SPF/DKIM for better inbox delivery.

Price Comparison

Service	Free Plan	Starting Paid	Included Emails	Extra / Overage	Fit for MileX
Mailgun Preferred	\$0, 100 emails/day	\$15/mo Basic	10,000 emails/mo	From \$1.80 per 1,000 extra emails on Basic	Best low-budget choice among your preferred options. API and SMTP both available.
Postmark Preferred	\$0, 100 emails/mo	\$15/mo	10,000 emails/mo	\$1.80 per 1,000 extra emails	Very strong for transactional emails. Better if delivery quality matters more than free usage.
Resend	\$0, 3,000 emails/mo, 100/day limit	\$20/mo Pro	50,000 emails/mo	\$0.90 per 1,000 extra emails	Best developer experience for Next.js, but not your preferred provider.

Service	Free Plan	Starting Paid	Included Emails	Extra / Overage	Fit for MileX
SendGrid	\$0 trial/free plan varies by current offer	From \$19.95/mo Essentials	Often starts around 50,000 emails/mo on Essentials	Plan-based	Popular but setup and reputation handling can feel heavier.
Amazon SES	Up to 3,000 message charges/mo for first 12 months for new AWS customers	No monthly minimum	Pay as used	\$0.10 per 1,000 outbound emails plus possible data/add-on costs	Cheapest at scale, but setup is the most technical.

Meaning of overage: If your plan includes 10,000 emails and you send 12,000, the extra 2,000 emails are charged separately. Example: \$1.80 per 1,000 means 2,000 extra emails costs \$3.60.

Best Choice for Your Project

Best low-budget start: Mailgun Free

Jodi daily email volume 100 er niche hoy, Mailgun Free diye start kora best. MileX initial workflow-e offer letter and internal notifications likely low volume, so this can work during early use.

Best paid option from your preference: Mailgun Basic \$15/mo

Mailgun Basic and Postmark both \$15/mo and 10,000 emails/mo include kore. But Mailgun free tier 100/day, Postmark free only 100/month. Budget kom hole Mailgun gives more room for testing and early production.

Best delivery quality: Postmark \$15/mo

Postmark is very strong for transactional email. If MileX offer letter delivery is business-critical and budget allows \$15/mo, Postmark is excellent. But testing/free usage is limited.

Final recommendation

Start with Mailgun Free. After real usage starts, upgrade to **Mailgun Basic \$15/mo**. If you later face inbox/spam issues or want stronger transactional delivery, switch to **Postmark \$15/mo**.

Purchase / Setup Process - Mailgun

1. Go to mailgun.com/pricing.
2. Click Try for free or Get started under Basic.
3. Create Mailgun account and verify your email.
4. Add your sending domain. Recommended sender: no-reply@yourdomain.com.
5. Mailgun will show DNS records for SPF/DKIM/tracking. Add these records in your domain DNS.
6. Wait until domain status becomes verified.
7. Create an API key from Mailgun dashboard.
8. Add environment variables in your app/server:
 - MAILGUN_API_KEY
 - MAILGUN_DOMAIN
 - EMAIL_FROM=no-reply@yourdomain.com
9. In MileX backend, connect Generate & Email Offer Letter to Mailgun API.
10. Send first test email to your own Gmail and check Inbox/Spam.

Purchase / Setup Process - Postmark

1. Go to postmarkapp.com/pricing.
2. Click Start free trial.
3. Create account and verify your email.
4. Create a Server for MileX transactional emails.
5. Add a Sender Signature or verify a full domain. Domain verification is better.
6. Add SPF/DKIM DNS records shown by Postmark.
7. Create or copy Server API Token.
8. Add environment variables:
 - POSTMARK_SERVER_TOKEN
 - EMAIL_FROM=no-reply@yourdomain.com
9. Connect MileX backend email route with Postmark API.
10. Test offer letter email and check delivery logs in Postmark Activity.

Purchase / Setup Process - Resend

1. Go to resend.com/pricing.
2. Create account and verify email.

3. Add your sending domain.
4. Add DNS records for SPF/DKIM.
5. Create API key.
6. Add env variables:
 - RESEND_API_KEY
 - EMAIL_FROM=no-reply@yourdomain.com
7. Use backend API to send customer offer letter emails.

Purchase / Setup Process - SendGrid

1. Go to sendgrid.com/en-us/pricing.
2. Create account and choose Free Trial or Essentials plan.
3. Complete sender/domain authentication.
4. Add SPF/DKIM DNS records.
5. Create API key with Mail Send permission.
6. Add env variables:
 - SENDGRID_API_KEY
 - EMAIL_FROM=no-reply@yourdomain.com
7. Connect backend API to SendGrid Mail Send API.

Purchase / Setup Process - Amazon SES

1. Create AWS account at aws.amazon.com/ses.
2. Open Amazon SES console and choose a region.
3. Verify your sending domain.
4. Add SPF/DKIM DNS records in your domain DNS.
5. Request production access because new SES accounts usually start in sandbox mode.
6. Create IAM user or access keys with SES send permission.
7. Add env variables:
 - AWS_ACCESS_KEY_ID
 - AWS_SECRET_ACCESS_KEY
 - AWS_REGION
 - EMAIL_FROM=no-reply@yourdomain.com
8. Connect MileX backend API to Amazon SES.

How Email Will Work in MileX

1. KAM creates recommendation and enters customer Email Address.
2. Sales prepares rate and Line Manager approves.
3. Sales clicks Generate & Email Offer Letter.
4. MileX backend reads customer email from record.recommendation.emailAddress or record.emailAddress.
5. Backend sends email through Mailgun/Postmark API.
6. Database stores sent status: sentTo, sentAt, providerMessageId, and status OFFER DELIVERED (PENDING AGREEMENT).

Cost Examples

Monthly Emails	Mailgun Basic	Postmark	Resend Pro	Amazon SES
500	\$0 on Free if within 100/day, or \$15 paid	\$15 paid, or free only if under 100/mo	\$0 free	About \$0.05 after free tier rules
2,000	\$0 on Free if within 100/day, or \$15 paid	\$15 paid	\$0 free	About \$0.20 after free tier rules
12,000	\$15 + \$3.60 overage = \$18.60	\$15 + \$3.60 overage = \$18.60	\$20	About \$1.20 plus possible attachment/data costs
50,000	Foundation \$35/mo likely better than Basic overage	\$15 + overage for 40,000 emails	\$20	About \$5 plus possible attachment/data costs

Important: Always verify domain DNS records. Without SPF/DKIM, customer offer letters may go to Spam. Also check billing dashboard because overage can be billed automatically.
